IWG/ID-35 36
Control No.
29 September 1954

MEMORANDUM FOR: IWG

SUBJECT: Transmittal of Consultant's Report on "The
Intelligence Support for Economic Warfare"

1. Attached is a CIA consultant's report which is distributed as a draft working paper for information and comment in connection with the preparation of a final report to be furnished the EDAC Executive Committee.

2. The Second Annual Progress Report of the IWG states that "in connection with interagency planning for the conduct of economic warfare in time of war, the IWG may be called upon to undertake a study of the intelligence support that would be required." This paper undertakes to provide a compendium of information on the subject and includes a reference to the role of IWG in a period of economic warfare. It is suggested that prior planning in this field will help prevent the costly improvisations which characterized organization for economic warfare in two world wars.

3. This paper has not been fully coordinated within CIA nor within the IAC or EDAC communities. Members will be requested to comment on the attached at an early meeting of the IWG.
